Professional Summary

Front-end developer specializing in TypeScript, Angular, and React, building scalable and performant interfaces with a strong focus on real-time communication. Passionate about cybersecurity and secure development practices, collaborating closely with product teams.

Experience

Magnetic, Front-end Developer   Remote

- Led the evolution and maintenance of Tikket, ensuring scalability, performance, and new feature delivery.   Feb 2025 - Present
- Built a lightweight, customizable AI-powered chat widget in React, easily embeddable across platforms.
- Implemented MCP (Model Context Protocol) enabling AI-driven advanced workflow automations (e.g., full marketing campaigns).
- Collaborated with cross-functional teams to align technical implementations with product and business goals.

Tikket, Front-end Developer   Remote

- Developed reusable modules and optimized front-end architecture using Angular+, RxJS, NgRx, and Tailwind CSS.   Aug 2023 - Feb 2025
- Refactored socket architecture to improve real-time communication performance.
- Resolved major release bottlenecks by improving feature delivery pipelines and stabilizing deployments.
- Integrated Sentry, reducing production errors by over 98%.
- Led a full upgrade of Angular to modern versions, improving long-term maintainability.
- Delivered 100–150 story points per sprint (~50 tasks biweekly) in a fast-paced SCRUM environment.
- Worked closely with Product Owners and Scrum Masters to ensure delivery aligned with business goals.

Tecnología AVL, Full-Stack Developer   Caracas, Venezuela

- Developed scalable solutions using Angular+ and TypeScript, including facial recognition systems and WhatsApp automation bots.   Nov 2022 - Jul 2023
- Built Chrome/Firefox extensions in JavaScript to streamline internal CRM workflows.
- Created and maintained REST APIs with Node.js and Express, ensuring robust data validation and clean architecture.

Courses

Udemy, Angular: From Zero to Expert – 2023 Edition (Fernando Herrera)	Jan 2023 - Jan 2023
Udemy, RxJS: From Zero to Advanced	Jan 2023 - Jan 2023
Udemy, Redux in Angular with NgRx	Jan 2023 - Jan 2023
DevTalles, Angular Pro: Take Your Fundamentals to the Next Level	Jan 2023 - Jan 2023
DevTalles, SOLID Principles and Clean Code	Jan 2023 - Jan 2023

Skills

Frontend Development: Proficient in Angular+, React, TypeScript, JavaScript, RxJS, NgRx, Tailwind CSS, HTML5, CSS3, and SASS for building scalable, performant user interfaces and real-time communication features.

Backend Development: Experience with Node.js, Express.js, REST APIs, WebSockets to create scalable backend solutions and integrations.

Tools and Practices: Experienced with Sentry for error monitoring, Karma and Jasmine for testing, Git for version control, and SCRUM agile methodologies.

Cloud and Deployment: Familiar with AWS cloud services and scalable deployment pipelines.

Security and Code Quality: Focus on cybersecurity, secure development best practices, SOLID principles, clean code methodologies.

Languages

Spanish (Native speaker), **English** (B2)

Interests

Cybersecurity and secure development best practices
